

Freight Car Data

Researched by Bob Trop

Boxcars:

Not all cars are referenced in this spreadsheet, nor does this spreadsheet include boxcars from mergers. My interests are in the early 70's, modeling the UP in the Blue Mountains in Sept. 74. Most of the info reflects cars that would be present during this time period, and dates after 1974 are generally not referenced. Also, the majority of the one or two cars owned are omitted, as well as automobile assigned service
